AND LIFTS

Heavy Duty Stair Lift

Features:

- Industry leading weight capacity.
- Spacious comfortable contoured seat.
- Smooth starts and stops.
- Operates on household current.

Specifications:

- 500lb capacity
- Top seat height 20"
- Bottom seat height 23"
- Travel up to 20'
- Track-extruded aluminum
- Motor 1/2 hp 90 VDC
- Electric supply 110 VAC grounded outlet
- Aircraft cable rated at 4,200 lb breaking strength
- Durable off white powder coat finish, light almond upholstery
- Constant pressure pendant control, and 2 hand or foot activated call controls
- 2-year warranty on all component parts and drive train.

Safety:

- Constant-pressure controls to stop the lift the instant you release the control.
- Limit switches automatically shuts unit off at the top and bottom of the stairs
- Seat swivels 180 degrees toward top landing for safe and easy entry and exit
- Safety switch prevents lift from running when the seat is to in proper position

The seat swivels at the top landing making it easier to get on and off the lift safely. Safety sensors prevent the lift from running when the seat is not in the proper position

23" wide, high-backed contoured seat helps ensure a comfortable and secure ride.

Heavy-duty armrests help provide more secure transfer.

Reinforced footrest for added stability.

Due to the overall size of the lift, a minimum of 36" wide staircase is recommended
